

## Security Level 2

- Single sliding window
- Permanent perforated stainless steel mesh on the outside of the window offers good visibility and ventilation
- Suitable where contraband is an issue
- No visible hardware – free opening for patient operation
- Secure clip in plates
- Anti-ligature handles
- Perforated wrap around glazing gasket for sash

The Specifier must ensure that the Security Level chosen is suitable for the occupants for present and future use.

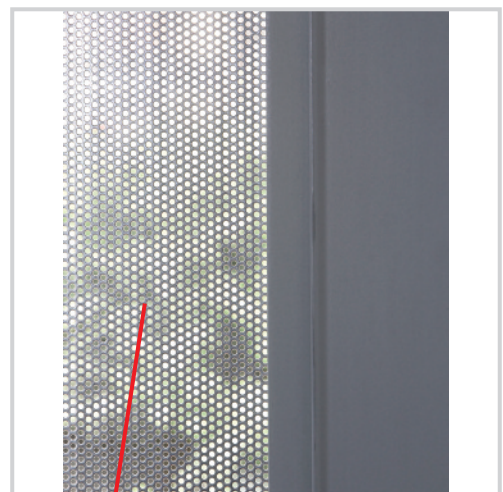

Permanent mesh on the outside of the window

Patient has full control of the window for their own comfort

Vent opens to allow ventilation and security. Perforated stainless steel mesh stops the flow of contraband in or out of the window

Perforated stainless steel mesh offers ventilation and visibility (as shown in 'Security Level 3' pictures on page 9)
