

# Kawneer's AA®3110 Horizontal Slider. Lateral thinking for optimum safety in mental healthcare units.

Thermally broken  
to conserve heat,  
reduce fuel costs  
and control  
condensation.

Continuous airflow  
for Document F  
compliance.

Robust stainless  
steel track and  
wheels for smooth  
running, ease of  
use and minimal  
maintenance and  
life cycle costs.

Wrap-around  
glazing  
No bead,  
gasket cannot  
be removed,  
reducing  
opportunities  
for self-harm.

Accommodates  
specialist  
safety glass  
allowing  
24-33mm glazing.

Market leading  
weather  
performance  
with concealed  
drainage.  
Watertightness  
Class 9A 600Pa.

Kawneer's AA®3110 is the perfect aluminium window solution for **demanding caring environments**. It is a proven design, currently being used in a number of mental healthcare projects.

With safety paramount we have included Kawneer's **anti-ligature hardware, gaskets and locking mechanisms**. And of course the **smooth lateral sliding action** is itself a safety feature, as the window does not project inside or outside the building.

AA®3110 is available in **any size up to full patio door**. The design ensures **continuous airflow** in line with Document F of the Building Regulations. It is thermally broken to facilitate compliance with Document L. And the stainless steel track is proven to provide **reliable performance** with **minimal maintenance and life cycle costs**.

All this in a stylish design, perfect for **new build** or **refurbishment** projects. There's even a **dual colour** option.

**Contact our Architectural Services Team** about your next project and make the most of their **unrivalled wealth of knowledge and experience** in the mental health sector.
