

Architectural Services Team

To enhance our professional service to specifiers and main contractors, we have a dedicated **Architectural Services Team**.

The team will guide customers through all stages of a project's design and development. The team is based at our head office in Runcorn and will complement our field-based network of architectural advisers.

If you are an Architect, Main Contractor, Consultant or Quantity Surveyor the Architectural Services Team can assist by:

1. Proposing optimal glazing solutions to meet the aesthetic, commercial and performance requirements of the project
2. Producing CAD Details
3. Writing NBS Specifications tailored to the project
4. Issuing details of Kawneer approved specialist sub-contractors who will quote for the supply and installation of the glazing/envelope package

The team has substantial experience of Kawneer's curtain walling, windows, doors and framing systems in traditional stick and contemporary modular builds in sectors ranging from residential and retail to healthcare, education, MOD and commercial.

Wales Millennium Centre

Roland Levinsky Building, University of Plymouth

Evelina Children's Hospital, London

For project advise and support please contact the Architectural Services Team direct :
